Annex C - Quality Check Report

General description of the sources of information and data used for reporting

For section B, there was a questionnaire sent to reuse operators.

Detailed description of the methods used for reporting on measures on reuse in accordance with section A and for reporting on the amount of reused products in accordance with Section B

Please describe the methods for measuring reuse. The description shall include the following:

(a) Reuse operations that are included within the scope of reuse for the purposes of the measurement *

B: Flea markets, recycling centers, charity organizations, auctions, shops for reused products, online stores for used goods

124

(b) Short description of the methods used *

B: A survey sent to identified reuse actors

43

(c) Methods used to identify the reuse operators *

B: Based on the previous 2023 survey. The list was updated by using "Renet" network (network of reuse actors). The survey was also shared in the social media

157

(d) Entities providing data reported in Section B of the report *

Flea markets, recycling centers, charity organizations, shops for reused products, online stores for used goods

111

(e.1) Size and selection of the sample or scale *

23

2

(e.2) Methods used for sampling or scaling *

The announced amounts by actors who had answered for 2021 questionnaire but not in 2024, and were still in operation, were added to the 2024 results by using conversion factors that were conducted from actors w

250

(f) Conversion factors used *

Textiles: 0,61; Furniture: 14; Electric: 4,2; Construction: 4,16; Other: 5

74

(g) Information on qualitative or quantitative indicators and on the level of that target and the products covered by it *

No set targets

14

(h) Main issues affecting the accuracy of the data *

A low response rate and uncertainty concerning the conversion factors (the product classes should be examined on a more detailed level)

135

(i) Data validation process *

Comparing to the results from 2021 questionnaire

Notification of methodological changes and problems
