Code: 3

Measure name

FI002. Property maintenance and repair website was published

Pub auth

Finland's environmental administration

Products

Buildings and building components

Reuse operations

Maintenance, repairing, reuse of demolition components and parts

Content of the measure

Information

Actions to follow

Not specified

Other

<https://www.ymparisto.fi/fi/rakennettu-ymparisto/rakentaminen/kiinteistojen-yllapito-ja-korjaaminen> (in Finnish)

Code: 1

Measure name

FI003. Study of measures to promote the reuse of components of end-of-life vehicles

Pub auth

Environmental administration: Centre for Economic Development, Transport and the Environment for Pirkanmaa

Products

End-of-life vehicles

Reuse operations

Reuse of components, reuse markets, data service of market terms

Content of the measure

Information, study

Actions to follow

The background of the study is the government program according to which an information platform for end-of-life vehicles should be established based on Traficom's existing register to meet the goals of the end-of-life vehicles.

Code: 4

Measure name

FI004. From Recycling to Circular Economy National Waste Plan to 2027 was approved by the government in 2022

Pub auth

Ministry of environment

Products

Packaging and single-use-products, EEE, building products and components, household items, textiles

Reuse operations

Secondhand, sharing, repair, durable and long-lasting products, building partnerships, economic support, increasing data and awareness

Content of the measure

For public sector:

2.3 The public administration will reduce the amount and harmfulness of its own waste in its operation

For household items:

3.1 Measures to increase the lifespan of products financial guidance will be identified and implemented

3.2 The EU sustainable products initiative will be implemented

3.3. The EU textile strategy will be implemented

3.4 Repair services will be made a visible part of commercial operations

For EEE:

7.1 Operational guidelines for organizing waste collection in accordance with the Waste Act will be created to enable reuse

7.2 Research and experiment funding for the lifetime of electrical and electronic equipment is managed to extend and enable reuse

7.4 Strengthening the re-use expertise of operators covered by the producer responsibility system

7.5 Information aimed at consumers about the service life of the devices, repair and reuse possibilities and warranty periods

7.6 Operating instructions are created for reuse operators

Actions to follow

Follow-up indicators set for preparation for reuse of EEE, also qualitative follow-up of measures is carried out.

FI0012. Project: SMART - Smart technology to extend the life cycle of furniture 1.11.2022–31.7.2025

Pub auth

Funding for green transition development projects from the European Regional Development Fund

Products

Furniture

Reuse operations

Secondhand sale, brokerage, rental, restoration and repair of furniture and the materials used in it.

Content of the measure

Use of Artificial intelligence and smart automation in service and process innovations for reuse

Actions to follow

Reporting to the funder

Other

<https://kierratyskeskus.fi/tietoa-kierratyskeskuksesta/hankkeet/#alya-hanke> (in Finnish)

Code 1**Measure name**

FI0013. Report: Circular economy in municipalities

Pub auth

Finnish Environment Institute and University of Turku (Funding from Life IP, ministry of Finland and SITRA)

Products

Not specified

Reuse operations

Municipal reuse centers, measurement of reuse

Content of the measure

The work assessed the current state of the circular economy and development needs in municipalities, and made proposals for measures for municipalities and administration in general. Reuse and its potential was identified in several activities.

Actions to follow
